

Advances in Sheep Production

Burleigh Dodds Science Publishing are delighted to announce the publication of their new title: [Advances in sheep production](#), edited by **Lesley Stubbings** (Consultant, UK) and **Kate Phillips** (Consultant, UK).

The book provides a comprehensive overview of the major challenges facing global sheep production and the specific measures implementable to improve sustainability, animal health and product quality.

The book also considers the contribution of breeding to improving non-production traits, management practices to improve lifetime health and performance, as well as ways of monitoring and improving health, welfare and nutrition.

Find out more about this new book [here](#).
